CARDIO-ARTERIAL GUARD

Available in Capsules
Nappi Code: 607045-002

CARDIO-ARTERIAL GUARD

Can medicine look to Nature for effective control of heart diseases, blood pressure and cholesterol? Research has recently uncovered compelling evidence that natural dietary supplements, may act as effectively as prescription medication.

Cardio-Arterial Guard was designed and developed as a tool to improve your lifestyle and the health of your heart. It contains special nutrients to help promote and then maintain a healthy heart and circulation.

Cardio-Arterial Guard is a multi-functional cardiovascular formula. It enhances the performance of the heart and blood vessels with a precise combination of synergistic factors.

Cardio-Arterial Guard can be used to aid the following conditions:

- ✓ Arterio Sclerosis
- ✓ Hypertension
- ✓ High Cholesterol
- ✓ Heart Disease

- Antioxidant -

Care for Cardiovascular Diseases

- This is an advanced doctor-designed formulation that can assist in the restoration of arteries to a younger state and improve overall health.
- This formulation assists in enhancing the performance and restoration of your heart and blood vessels to a more natural state, with a precise combination of synergistic-acting complexes and factors.
- Research has proven that this formulation reduces blood cholesterol levels, removes calcium from hardened arteries as well as arthritic joints and removes toxic heavy metals from the body.
- The Flavonoids compound supports normal blood pressure and serum cholesterol deposition in the arterial wall and improves heart contractions.
- Cardio-Arterial Guard helps remove excessive levels of calcium, metals and metal compounds from cells.
- Natural chelating of the orotates and asparates of Potassium and Magnesium and the enzyme Bromelain produce clinically observed effects on protecting and improving heart functions.
- Co-enzyme Q10 provides critical cardiovascular energy support while Forskolin works to lower blood pressure.
- The remaining ingredients work synergistically to support healthy coronary circulation and support healthy cholesterol levels.

What is the recommended dose?

1 Capsule to be taken morning and evening before meals.

LIFEFORCE CARDIO-ARTERIAL GUARD

THE BENEFITS:

- ✓ Restores arteries to a younger state and improves overall health.
- ✓ Reduces blood cholesterol levels.
- ✓ Removes calcium from hardened arteries as well as arthritic joints.
- ✓ Removes toxic heavy metals from the body.
- ✓ In addition to its metal-removing role it is an effective cross linking inhibitor
- ✓ Helps to maintain a strong, regular heart rhythm with ingredients such as Co-enzyme 10, Taurine, L-Arginine and L-Carnitine.
- ✓ The alkaloids are beneficial for ventricular arrhythmias caused by a lack of oxygen. It has an anti-fibrillation effect and protects the myocardium from injury.
- ✓ The Amino acid Taurine, regulates membrane excitability and prevents a drop in potassium levels inside heart cells that may result in arrhythmias.
- ✓ Co-enzyme 10 supplementation generates heart energy to prevent ventricular premature beats and supra ventricular arrhythmias.
- ✓ Grape Seed Extract is a Super Antioxidant up to 50 times more powerful than other antioxidants.
- ✓ Grape Seed Extract is known to strengthen the walls of blood vessels reduce inflammation and generally offer nutritional support to tissue containing collagen and elastin.

Cardio-Arterial Guard is available from your pharmacy & selected health shops.

BENEFITS OF SELECTED COMPONENTS OF CARDIO-ARTERIAL GUARD

Bioflavonoids: Polyphenol-rich substances found in all fruits and vegetables, have long been known to possess anti-allergic effects.

- Studies as far back as the 1950's show that Flavonoids could prevent the release of histamines.
- Some years later, however more attention was paid to the link between Flavonoids and allergies.
- Flavonoids block the initial release of histamine itself, and therefore prevent allergic reactions rather than treat the symptoms - providing a new form of relief with a track record of clinical efficacy and safety.
- The Flavonoids compounds support normal blood pressure and prevent serum cholesterol deposition in the arterial wall as well as improve heart contractions.

The Caroteam: Vitamin A, C & E (tissue antioxidant), with Tocopherol and Tocotrienol deliver a supply of the primary naturally occurring carotenoids.

- It provides a synergistic mix as well as a powerful antioxidant.

CO-Enzyme 10: is a naturally occurring fat-soluble, vitamin-like nutrient.

- Its fundamental role is that of a cellular energy carrier for the mitochondria.
- It is involved in the stabilisation of cell membranes and is a potent antioxidant carried on LDL's (protects DNA) and is therefore Cardio protective.
- It provides critical support for cardiovascular bioenergetics and myocardial functions.

Taurine: modulates the activity of cyclic AMP and calcium in the heart.

- Taurine regulates membrane excitability and prevents a drop in potassium levels inside heart cells that may result in arrhythmias.

L-Carnitine: enhances oxygen utilization, myocardial energy and normal heart contractions.

L-Arginine: improves coronary circulation and lowers cholesterol.

Seaweed (Kelp) Powder: is rich in selected vitamins and contains more than fifty trace minerals.

- It has a normalising effect on the thyroid gland.
- It aids poor digestion, reduces flatulence and relieves constipation.
- It assists in the maintaining healthy mucous membranes and assists in treating Arthritis and Rheumatism.
- Can assist in curing of colds and skin irritations.

Grape Seed Extract: has been used clinically in Europe for a number of conditions including:

- Circulatory problems of the heart and brain
- Capillary fragility
- Macular degeneration

Vitamin E with Tocopherol and Tocotrienol: have been included.

- Vitamin E, in the form of natural d-alpha vitamin E, mixed with Tocopherol and Tocotrienol.
- Natural Vitamin E, the body's premier lipid antioxidant, protects against cancer, heart disease, strokes and other conditions and is two to five times more bio-available than synthetic Vitamin E.
- When combined with Tocopherol and Tocotrienol is helpful in preventing heart disease and free radical damage to brain cells.
- Tocotrienol is a powerful vitamin E fraction that may be forty times more potent than equivalent amount of standard Vitamin E supplements.

Lipoic Acid: few antioxidants can match Lipoic acid.

- Lipoic Acid recycles other antioxidants such as vitamin C and E, and is more effective against a broader range of free radicals.
- Lipoic Acid may provide benefits for cataracts, diabetes, heart disease, nerve degeneration, liver disease and AIDS.
- Lipoic Acid functions in both fat-soluble and water-soluble body tissues.

Essential Fatty Acids (EFA's): Omega 3 and Omega 6 are vital for normal health as they form part of the protective membrane around each cell. They assist with energy production.

Benefits of EFA supplementation

- Lowering of LDL
- Increasing the production of anti-inflammatory Prostaglandins (hormone-like structures required for the healthy working of our bodies as well as helping to regulate normal arterial muscle tone)
- Reducing the risk of blood clot formation
- The body uses EFA's for the correct metabolism and transport of cholesterol and they help to normalise blood (platelet stickiness)

EPO (Omega 6): Lowers cholesterol levels as effectively as drugs. Lowers blood pressure (Hypertension)

EPA and DHA (Omega 3): Are vital to optimal cardiovascular, neurological and immunological functioning. They build cell structures and produce Prostaglandin's – essential in the maintenance of the cardiovascular system.

DEFICIENCY DISEASE AND SYMPTOMS

- ✓ High Cholesterol
- ✓ Hypertension
- ✓ Irregular Heart Rhythms
- ✓ Arteriosclerosis

CONCLUSION:

Cardiovascular disease is a result of a complex interaction of genetics, diet and lifestyle choices. While there is no simplistic picture of heart disease, blood pressure and cholesterol, it is encouraging to know that Nature can supplement and assist your cholesterol and high blood pressure efforts with a safe and effective option.
